KC3WBR-Robert, N3AK-Jon, KCUCB-Anthony, AC3FE-John

Chirs opened the net at 2300Z. He is working on getting an exercise with Charles County. This is maybe in preparation for the October Maryland/District of Colombia for their exercise. He is working on setting up some smaller exercises that we can do, like activating a shelter or some parks on the air. Brad is going to be net control for the next week. N5TB is working on the down APRS repeater and will bring up on the air as soon as he can.

Neil brought up the group on the afib episode. I spent the weekend in the St Mary's Hospital, where they had to shock my heart to bring it out of afib. I think that this the first time they tried this. It worked very good. I will not be at the Thursday meeting, just trying to go slow and get my booster shot so that I won't be back in the hospital. We won't be doing much this weekend, just keeping a low profile.

Jim is up for any exercises that we can do. He is going to try put some of his u-tube videos on the group.io page.

Rick is up for any exercises that we can schedule. He is not going to anything for this weekend.

Robert going to take family camping this weekend. Is looking forward for the exercises.

Jon joined the net late due to some work. He is going to look into the idea of a zoom session for the club meeting. Maybe we could use utube or have a utube live session in conjunction with the club meeting.

Anthony joined the net late. He mentioned that there was a SKYWARN class on June 21. Is it being organized by the EMA in St Mary's County. He is going to email out the links, Chris said that he would put the links on the group site for anyone that would like to attend. It is going to be in in-person meeting, but don't know where is going to be held.

John joined the net late. He is going to be rewiring his boat this weekend. He is also up. He is ready for any exercise that can be set up. He would like to take the Sky Warn class.

Chris closed the net at 2346Z
