Amateur Radio Emergency Service

9/4/23 2300Z

Member ship: KB2SKP-Chris, AC3CU-Neil, KC3RWE-Brad, KB1YZ_Jim,
KC3WBR-Robert, AC3FE-John

Chris opened the meeting at 2300Z. He asked if anyone had any formal traffic for the net. There was none. On Wednesday, September 6, at 8:00AM, the CalEX exercise will kick off. This exercise is a response to a simulated emergency at the Calvert Cliffs Nuclear power plant. Chris will activate the amateur equipment in the emergency center. This exercise will last from 8:00AM until 12:00PM. On October 7, there will be an SET taken place here in the county. The club will spread out and locate some of the geoditic markers in the county. Tonight, there is no topic, Chris asked if anyone would be available on Wed. for the exercise.

Neil said that he would be available to check in and see how things go. He asked what frequency would we be using? Chris said that he would use the 147.390MHz repeater and maybe hop around some.

Brad said that he wouldn't be available due to work. He asked if we could have a meet at the EOC? Chris said that he would try and set up a time when we could.

Jim is looking forward for the SET in Oct. Jim saw the message about the SET and didn't get a chance to respond yet. He would like to be part of the team for the northwest section.

Robert has set up plans for the teams to find the markers. He is trying to set up a cross-band repeater at his house using his FTM-300.

Chris closed the meeting at 2323Z.
